Profile

I build small, useful products and measure whether they work: web and mobile apps, browser extensions, and machine learning research on health data. I am in the third semester of the Master of Informatics at Universitas Ahmad Dahlan. Open to freelance projects, taken on at a relaxed pace while I focus on research.

Experience

Coding Teacher Kalananti by Ruangguru, Pontianak Taught programming fundamentals to young students with Scratch, Blockly and Python.	Jul 2025 to Oct 2025
IT Support Klinik Utama PKU Muhammadiyah Kitamura, Pontianak Maintained the clinic's server and website, and designed content for its social media.	Jan 2024 to Oct 2025
Frontend Developer Biro Logistik Polda Kalbar, Pontianak Built the web interface of appbjonline.com with HTML, CSS and Bootstrap, working with the backend team.	Feb 2023 to Jul 2023

Layout Designer, then Advisor Ukhuwah Magazine, Pati Laid out each issue of the magazine, then advised the editorial team on content (from Aug 2021).	Aug 2018 to Sep 2022
Secretary, HM2IF Universitas Ahmad Dahlan Informatics master's student association.	2025/2026

Education

Master of Informatics Universitas Ahmad Dahlan Research on machine learning for health data.	Oct 2025 to present
Bachelor of Informatics (Teknik Informatika) Universitas Muhammadiyah Pontianak Thesis on liver disease classification with K-NN.	Sep 2018 to Dec 2022

Publications

Comparative Evaluation of Boosting Ensemble Models for Medication Adherence Prediction in Patients with Non-Communicable Diseases Jurnal Sisfokom, Vol. 15 No. 3. With M. K. Biddinika and H. Yuliansyah. doi.org/10.32736/sisfokom.v15i3.2712	Jul 2026
Frozen LLM-generated vs manual preprocessing for medical-claims adherence classification Submitted to IJEEEMI. Notebooks: github.com/ihyaabrar/llm-vs-manual-preprocessing	Submitted

Selected projects

Gerei BKMT

Live

Point of sale, inventory, profit sharing and a public storefront for PD BKMT Kubu Raya.
Next.js 14, Prisma. gerai-bkmt.vercel.app

MediCode

Browser extension

ICD-10 and ICD-9 lookup with INA-CBG tariff estimates for health workers. React, TypeScript, Dexie.

VisionPOS

Computer vision

A cashier that recognises products through the camera. FastAPI, React, YOLO.

Desktop AI Companion

Desktop app

Local-first companion that remembers you, sees your screen and talks back. Tauri 2, React.

CertGen

Web tool

Generates hundreds of certificates in the browser, with no backend. Next.js 15, Fabric.js, jsPDF.

Skills

Web and mobile: TypeScript, JavaScript, React, Next.js, Node.js, Tailwind, Capacitor, Tauri

Data and AI: Python, FastAPI, scikit-learn, LightGBM, SHAP, YOLO, Streamlit

Databases and deployment: Prisma, MySQL, Docker, Git, Vercel

Languages: Indonesian (native), English (limited working proficiency)

Courses and certificates

Learning Data Analytics: 1 Foundations

Machine Learning with Python: Foundations

Machine Learning with Python: Decision Trees

Introduction to Data Analysis using Microsoft Excel

Introducing Robotic Process Automation
